

How much of your clients' assets should be growing tax deferred?

See the power of tax deferral with our digital calculator.

Jackson.com/taxcalculator

Wealth managers have tax-sensitive clients and a duty to manage after-tax results. While the erosive effects of taxes are nothing new, some strategies to better manage them are.

Jackson® provides wealth planners and portfolio managers with a tax-deferred* variable annuity that allows them to leverage the power of tax deferral.

Taxes destroy compounding (growth of \$1 million with and without tax deferral)

For illustration purposes only. **Past performance is no guarantee of future results.** Based on 60/40 blend of S&P 500 index and Bloomberg US Aggregate bond index for 10-, 20-, 30- and 40-year periods from 1983-2023. Assumes 30% annual turnover and 80% long-term capital gains. Tax rates reflect 2025 taxation rates; assumes the highest marginal tax rate for ordinary income, highest preferential rate for long-term capital gains, plus the net investment income tax where applicable and an effective state tax rate of 6.23%. Calculations performed by Jackson.

Indices are unmanaged and not available for direct investment. In addition, their performance does not reflect the various fees and charges associated with variable annuities. If these fees and charges were reflected, the performance shown would be reduced. Variable annuities involve investment risks and may lose value. Total return includes reinvestment of dividends and capital gains.

What is a variable annuity?

A variable annuity is a long-term, tax-deferred investment designed for retirement, involves investment risks, and may lose value. Earnings are taxable as ordinary income when distributed. Individuals may be subject to a 10% additional tax for withdrawals before age 59½ unless an exception to the tax is met.

* Tax deferral offers no additional value if an IRA or a qualified plan, such as a 401(k), is used to fund an annuity and may be found at a lower cost in other investment products. It also may not be available if the annuity is owned by a legal entity such as a corporation or certain types of trusts.

Jackson® is the marketing name for Jackson Financial Inc., Jackson National Life Insurance Company®, and Jackson National Life Insurance Company of New York®.

DESIGNED FOR TAX PLANNING

Tax deferral through a variable annuity can provide a powerful tool in your investment process.

- **Investment-only, tax-deferred variable annuity structure:** Allows for tax-deferred growth of nonqualified assets
- **Robust investment lineup:** Nearly 100[†] investment options

WEALTH TRANSFER MAXIMIZED

The unique structure of the variable annuity chassis protects assets from tax consequences until assets are withdrawn.[‡]

This provides opportunities for:

- **Growth:** Tax-deferred compounding growth and no forced dividend, interest, or capital gains distributions from underlying investment options
- **Flexibility:** Subaccounts in a wide variety of investment types and styles, with the ability to change allocations and rebalance without tax consequences
- **Control:** Proactively decide when income and taxes are realized

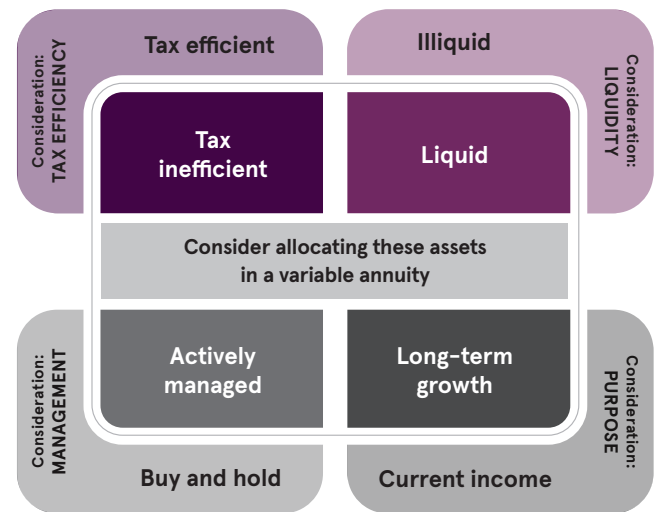

APPLICATIONS

The value of Jackson variable annuities lies in their numerous applications for investment professionals and tax-planning professionals alike.

Portfolio management

Common investment activities, such as rebalancing and changing allocations or managers, can increase tax drag. The tax-deferred chassis of Jackson variable annuities allows portfolio managers to optimize the investment process without increasing tax liability. Whether used for longer-term assets or as part of an asset-location strategy, Jackson offers ideas to help achieve investment goals for agency and trust accounts.

PORTFOLIO INVESTMENT CONSIDERATIONS

THE BENEFITS OF TRUST-OWNED ANNUITIES

Many investments are available for use in trusts, including corporate and municipal bonds, stocks, mutual funds, separately managed accounts, and annuities. However, the annuity option is sometimes overlooked by financial professionals and trustees. Irrevocable trusts can benefit from the same features that individuals find in annuities such as possible tax deferral, income control, and diversified investment options.[§]

TYPES OF TRUSTS

One question we often hear is, "Can trusts own annuity contracts?"

The answer is yes. Most trusts are eligible to own nonqualified annuity contracts. Some common trust types include:

- Credit shelter trust (CST) (also called Bypass Trust or B-Trust)
- Special needs trust (SNT)
- Irrevocable family trust
- Generations-skipping trust (GST)
- Charitable remainder trust (CRT)
- Charitable lead trust (CLT)
- Qualified terminable interest property trust (QTIP Trust)
- Living trust

[†] Select up to a maximum of 99 investments and adjust options or allocations up to 25 times each contract year without transfer fees. To prevent abusive trading practices, Jackson restricts the frequency of transfers among variable investment options, including trading out of and back into the same subaccount within a 15-day period.

[‡] Individuals may be subject to a 10% additional tax for withdrawals before age 59½ unless an exception to the tax is met.

[§] Diversification does not assure a profit or protect against loss in a declining market.

Contact your financial professional for more information on the tax-deferral benefits of annuities.

Before investing, investors should carefully consider the investment objectives, risks, charges, and expenses of the variable annuity and its underlying investment options. The current contract prospectus and underlying fund prospectuses provide this and other important information. Please contact your financial professional to obtain the prospectuses. Please read the prospectuses carefully before investing or sending money.
