PERSPECTIVE II®

THE MORE YOU WAIT, THE MORE YOU CAN TAKE

Add-on living benefits are available for an additional cost. Availability and certain terms may vary by firm. This material is authorized for use only when preceded or accompanied by the current prospectus.
YOUR LIFE. YOUR RETIREMENT. YOUR WAY.

Lifetime income\(^1\) protection, available through some of Jackson’s variable annuities with add-on benefits, is just one of the ways Jackson of NY\(^*\) can help you pursue Financial Freedom for Life\(^*\).

You’ve taken the first step toward financial freedom by partnering with a financial advisor. Now’s a great time to learn a little bit more about the choices in front of you.

**Protected* Income For Life\(^{SM}\)**

Longer lifespans are leading to more years in retirement. That means even more time to enjoy passions and to be with loved ones. A steady stream of lifelong income\(^1\) in retirement can help you pursue what matters most, and a variable annuity with an add-on benefit can provide that.

**What Is A Variable Annuity?**

It’s a long-term, tax-deferred investment that’s designed for retirement, involves investment risks, and may lose value. Any earnings are taxable as ordinary income when you take a distribution, and can be subject to a 10% additional tax if withdrawn before age 59½. Add-on benefits are available for an extra charge, in addition to the variable annuity’s ongoing fees and expenses.

**Lifetime Check\(^{SM}\)**

Imagine your income in retirement can be protected from market downturns, while still capturing the opportunity for growth.† Now imagine that retirement income lasting your entire life—no matter how long you live.

When you purchase a variable annuity with add-on living benefits, you can potentially receive a Lifetime Check that’s unaffected by interest rate fluctuations and market downturns. Your check comes monthly, quarterly, or yearly, so you can have income for the rest of your life—and your Lifetime Check even has the potential to keep growing.

---

\(^*\)Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company of New York\(^*\) and do not apply to the principal amount or investment performance of a variable annuity’s separate account or its underlying investments.

\(^1\)The guaranteed minimum withdrawal benefits (GMWBs) discussed in this brochure are available for an extra charge in addition to the ongoing fees and expenses of the variable annuity. Only one add-on living benefit and one add-on death benefit may be elected per contract. Once elected, benefits may not be canceled; please see prospectus for specific benefit availability. The long-term advantage of the add-on benefits will vary with the terms of the benefit option, the investment performance of the Variable Investment Options selected and the length of time the annuity is owned. As a result, in some circumstances, the cost of an add-on benefit may exceed the actual benefit paid under the option.

The latest income date allowed is age 95, which is the required age to annuitize or take a lump sum. Please see the prospectus for important information regarding the annuitization of a contract.

Any tax statements contained herein were not intended or written to be used, and cannot be used, for the purpose of avoiding U.S. federal, state or local tax penalties. Please consult your own independent advisors as to any tax, accounting or legal statements made herein.**
In addition to protected lifetime income\(^1\), Jackson of NY provides opportunities to grow your income through features like step-ups and deferral credits\(^2\).

**Maximizing Your Lifetime Income**
Building the money you’ll live on in retirement starts with growing your “protected balance” (see right). To generate the largest amount of income, you’ll want to grow your protected balance as much as possible.

**A Closer Look**
- **Protected Balance**: A value called the guaranteed withdrawal balance (GWB). This serves as your “protected balance” from which you’ll take income for life\(^1\).

**Two Ways to Grow**

**Capture Market Growth**
If your investment performs well, *step-ups* automatically lock in gains and grow your protected balance on each contract anniversary. Since, historically, markets are up more than they are down, it’s important to have that flexibility when more growth could lead to more income.

**Growth in Any Market**
**Annual deferral credits** are an additional amount that combines with your guaranteed annual withdrawal percentage and grows in years you wait to take income, regardless of what is happening in the market.

The above hypothetical examples are for illustrative purposes only and are not representative of the future performance of any particular product. Past performance is no guarantee of future results. Step-ups are applied on an annual basis, if applicable, to your protected balance, not the contract value.

Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company of New York and do not apply to the principal amount or investment performance of a variable annuity’s separate account or its underlying investments.
TO ENSURE THE MOST INCOME POSSIBLE, IT PAYS TO WAIT

Depending on your income needs, the longer you wait, the higher your Lifetime Check can be.

Annual Deferral Credits provide a unique way to grow your protected balance. You just need to decide when to start taking income. Here’s how Annual Deferral Credits work:

**Set Your Withdrawal Baseline.**

First, set your withdrawal baseline when you purchase LifeGuard Freedom Accelerator. This establishes your starting Guaranteed Annual Withdrawal Amount (GAWA) percentage. This is the amount of your “protected balance” that you can withdraw when you’re ready to take an income.

**Enhance Your Withdrawal Percentage.**

An **Annual Deferral Credit** is an additional amount that combines with the GAWA percentage each year you defer withdrawals (until the earlier of 15 years, or age 90). In years you decide not to take a withdrawal, Deferral Credits will apply – even if you’ve already taken withdrawals in other years. Your age when you elect LifeGuard Freedom Accelerator also determines your Annual Deferral Credit percentage.

*Annual Deferral Credit for ages 81-90: 0.40%

Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company of New York and do not apply to the principal amount or investment performance of a variable annuity’s separate account or its underlying investments.
Putting it Together
Want to learn more? Let’s take a closer look at how step-ups and deferral credits work together.

Protected Balance
The GWB serves as your “protected balance” from which you’ll take income for life.

Total GAWA%
The amount you can withdraw each year.

Lifetime Check Amount
Your check comes monthly, quarterly, or yearly, so you can have income for the rest of your life.

Putting it All Together

THE POTENTIAL TO ACCELERATE THE GROWTH!
In years that you get a step-up AND a deferral credit, your income grows even more.

This hypothetical example assumes:
Age on Initiation Date: 60
Starting GAWA%: 4.00%
Annual Deferral Credit: 0.20%
Deferral Period: 10 Years
Ending GAWA%: 6.00%

Step-ups happen when markets are up.
Deferral credits grow the longer you wait regardless of markets.

At age 70, assuming no market growth on a $100,000 investment and 10 years of deferral, your Lifetime Check would have grown from $4,000 to $6,000, annually.

It’s important to keep in mind the difference between your contract value and protected balance, which this example illustrates. While your contract value will fluctuate based on the investments you select, your protected balance will not decline as a result of investment performance; however, it is not a cash value, not available as a lump sum, and decreases on a dollar-for-dollar basis as you withdraw your guaranteed annual withdrawal amount (GAWA) or required minimum distribution (RMD).

The above hypothetical examples are for illustrative purposes only and are not representative of the future performance of any particular product. Past performance is no guarantee of future results. Step-ups are applied on an annual basis, if applicable, to your protected balance, not the contract value, and you receive the greater of the two, not both.
YOUR PRIORITIES. YOUR BENEFIT.

Now that we’ve reviewed the features that come with our suite of living benefits, it’s time to choose an add-on benefit that fits you.

With Jackson of NY, you can design your annuity to support your specific goals. Once you decide what’s most important to you, you’ll be ready to select an add-on benefit.

A Closer Look

Add-on Living Benefits: These strategies allow you to focus on your personal goals, knowing that you’ll receive guaranteed income for life.¹

Let’s Dive Deeper

Consult with your advisor and use the following sections to compare these options and determine which works best for you.
LIFEGUARD FREEDOM ACCELERATOR

Grow Income

- **Annual step-ups** in up market years increase the guaranteed withdrawal balance (GWB), the “protected balance” from which you take income. Choose from over 140 investment options to get the most of your growth opportunity.

- **Annual Deferral Credits** combine with the guaranteed annual withdrawal percentage and grow in years you wait to take income, regardless of what is happening in the market. Applies in years withdrawals aren’t taken, even if withdrawals have begun.

Take Income

- **Guaranteed withdrawals for life** beginning at age 59½.

- A **single or joint option** to provide guaranteed lifetime income for you or for two covered lives.

Available ages: 45-80
Living Benefit Charge: 1.17% Single Option; 1.26% Joint Option

LIFEGUARD FREEDOM ACCELERATOR DB NY

LifeGuard Freedom Accelerator DB NY has an **enhanced death benefit** that helps you pass on a greater legacy to your beneficiaries.

- **Protect a death benefit** equal to the sum of your premium payments that is reduced dollar-for-dollar for your allowed annual withdrawals. Keep in mind that withdrawals also reduce your contract value.

- **An annual contract anniversary step-up** of the death benefit helps you leave even more for your heirs if your investment options perform well.

**IMPORTANT CONSIDERATIONS:** Contract fees and poor market performance may also reduce the contract value. If, for any reason, your contract value falls to zero, the enhanced death benefit is terminated and your beneficiaries will not receive a death benefit, however, you may continue to receive guaranteed income. Please consider how taking your guaranteed income will affect the death benefit.

</thead>
</table>

As this hypothetical example illustrates, with good investment performance, you may be able to increase the amount you leave to heirs with an annual step-up of the death benefit.

Available ages: 45-75
Living Benefit Charge: 1.17%
Death Benefit Charge: 0.42%

This chart is based on a hypothetical contract, assuming no future premium payments, withdrawals, charges or income taxes. Performance indicated is not historical, nor is it meant to predict or indicate future performance. Performance has been plotted to show how the guaranteed minimum withdrawal benefit (GMWB) Death Benefit works in a hypothetical scenario.

Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company of New York and do not apply to the principal amount or investment performance of a variable annuity’s separate account or its underlying investments.
This material is authorized for use only when preceded or accompanied by the current contract prospectus and underlying fund prospectuses, which are contained in the same document. Before investing, investors should carefully consider the investment objectives, risks, charges and expenses of the variable annuity and its underlying investment options. This and other important information is contained in the current contract prospectus and underlying fund prospectuses. Please read the prospectuses carefully before investing or sending money.

Guarantees are backed by the claims-paying ability of Jackson National Life Insurance Company of New York and do not apply to the principal amount or investment performance of a variable annuity’s separate account or its underlying investments. They are not backed by the broker/dealer from which this annuity contract is purchased, by the insurance agency from which this annuity contract is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims paying ability of Jackson National Life Insurance Company of New York.

Total premium payments in any Contract Year after the first Contract Anniversary following the election of this add-on benefit are capped at the lesser of 5% of first-year premium or $10,000. At the time of any premium payment subsequent to election, the Protected Balance is increased by the premium amount, subject to a maximum Protected Balance of $10,000,000. The GAWA is equal to the GAWA prior to the premium payment plus the GAWA’s multiplied by the subsequent premium payment net of any applicable taxes.

In certain states, we reserve the right to refuse any subsequent premium payments. At election, the guaranteed withdrawal balance (GWB) is equal to net premium (minus any applicable taxes) subject to a maximum of $10 million. Add-on benefits are available for an extra charge in addition to the ongoing fees and expenses of the variable annuity. Only one add-on living benefit and one add-on death benefit may be elected per contract. Once elected, benefits may not be canceled; please see prospectus for specific benefit availability. The long-term advantage of the add-on benefits will vary with the terms of the benefit option, the investment performance of the Variable Investment Options selected and the length of time the annuity is owned. As a result, in some circumstances, the cost of an option may exceed the actual benefit paid under the option.

The latest income date allowed on variable annuity contracts is age 95, which is the required age to annuitize or take a lump sum. Upon mandatory annuitization at age 95, multiple annuitization options may be available, some of which allow you to lock in the enhanced death benefit. Please see the prospectus for important information regarding the annuitization of a contract.

On the contract anniversary or on immediately following the designated life’s attained age 59½, the for-life guarantee becomes effective provided: 1) the contract value is greater than zero and 2) the contract has not been annuitized. If the designated life is age 59½ on the effective date of the endorsement, then the for-life guarantee becomes effective on that date. All withdrawals reduce the GWB and, depending on the amount of withdrawals taken, adjusted for any GWB step-ups and any applicable bonus, the GAWA may be reset to a lower amount when the for-life guarantee becomes effective.

The GAWA percentage increases with Annual Deferral Credits for each year the Owner defers withdrawals, up to the end of the 15 years Deferral Credit Period or until the designated life reaches age 90. The percentage increase applied is determined based on the designated life’s age at issue. These increases are not affected by partial withdrawals but are only applied in years no withdrawals are taken during the contract year.

The GAWA percentage is determined at the time of issue and may only increase upon Annual Deferral Credits. All withdrawals, including systematic withdrawals, required minimum distributions (RMDs) and free withdrawals, apply to the total amount withdrawn in a contract year. The RMD withdrawal must be for this contract only and the owner must specify that the withdrawal is an RMD.

Impact of excess withdrawals: If at the time of withdrawal the sum of all withdrawals taken in a contract year is greater than the GAWA or RMD, the dollar-for-dollar portion is equal to the greater of (a) GAWA or the RMD less all prior partial withdrawals made in the current contract year or (b) zero. The GWB is equal to the greater of (a) the GWB prior to the partial withdrawal less the dollar-for-dollar portion reduced for the excess withdrawal and (b) the same proportion as the contract value is reduced or (b) zero. The GAWA is reduced for the excess withdrawal amount in the same proportion as the contract value.

Rules may vary upon spousal continuation or if the for-life guarantee is not in effect. Withdrawals under LifeGuard Freedom Accelerator are assumed to be the total amount deducted from the contract value, including any withdrawal charges and other charges or adjustments. Withdrawals in excess of free withdrawals may be subject to a withdrawal charge.

Election of 72(t)/72(q) distributions may not be appropriate on contracts with a living benefit. Withdrawals taken under IRC 72(t)/72(q) are not considered required minimum distributions for purposes of preserving the guarantees under the guaranteed minimum withdrawal benefit (GMWB). 72(t)/72(q) distributions under a GMWB will have the same effect as any withdrawal or excess withdrawal.

The timing and amounts of withdrawals may have a significant impact on the amount and duration of benefits. The closer you are to retirement may provide a more reliable forecast of your needs to make withdrawals prior to the ages when certain benefit features are locked in. Conversely, the younger ages may provide less reliable forecasts. Consult your representative or retirement planning agent as to the amount of money and age of the owner/annuitant and the value to you of potentially limited downside protection this GMWB may provide.

LifeGuard Freedom Accelerator with Joint Option is available on both qualified and nonqualified contracts. For qualified contracts, the annuitant and the sole primary spousal beneficiary, or annuitant and contingent annuitant on qualified custodial contracts, are defined as “covered lives,” and the owner and annuitant must be the same person. For nonqualified contracts, the joint owners are defined as the covered lives. Only a covered life may use the for life guarantee upon spousal continuation. The younger covered life is the designated life. At election, both covered lives must be between ages 45 and 80.

At election, the GMWB death benefit is equal to the GWB. Upon any premium payment subsequent to election, the GMWB death benefit is increased by the amount of the premium payment net of any applicable taxes subject to a maximum of $10 million. Withdrawals up to the GAWA or RMD reduce the GMWB death benefit by the amount of the withdrawal. Amounts withdrawn over the GAWA/RMD will reduce the GMWB death benefit in the same proportion that the contract value is reduced for the excess withdrawal amount. Not available with any other add-on death benefit. The GMWB death benefit is terminated if the contract value falls to zero. Fixed Account Options are not available with the election of LifeGuard Freedom Accelerator DB NY.

Select up to a maximum of 99 investments and adjust options or allocations up to 25 times each contract year without transfer fees. To prevent abusive trading practices, Jackson restricts the frequency of transfers among Variable Investment Options, including trading out of and back into the same subaccount within a 15-day period.

The total annual charges are calculated as a percentage of the GWB and deducted monthly and upon termination on a pro-rata basis across the Variable Investment Options. For LifeGuard Freedom Accelerator DB a portion of the charge is calculated as a percentage of the GWB and a portion is calculated as a percentage of the GMWB death benefit; both fees are deducted monthly and upon termination on a pro-rata basis across the Variable Investment Options only. On each 5th contract anniversary following the effective date of the endorsement, the company reserves the right to increase the charge subject to the maximum increase amount and maximum benefit charge stated in the supplement contract data pages. If the contract value fails to zero or at the time the benefit is terminated, the charge will be discontinued.

On each contract anniversary following the effective date of the benefit, the GMWB death benefit will automatically step up to the contract value if the contract value is greater than the GMWB death benefit. Subject to a maximum of $10 million. Step-ups end upon annuitization or termination of the contract.

Perspective II Variable and Fixed Annuity (VA775NY, VA775NY-CB1) is issued by Jackson National Life Insurance Company of New York (Home Office: Purchase, New York) and distributed by Jackson National Life Distributors LLC, member FINRA. This contract has limitations and restrictions, Jackson of NY issues other annuities with similar features, benefits, limitations and charges. Contact Jackson for more information.

Jackson is the marketing name for Jackson National Life Insurance Company of New York.
